

**UNO FARM**

# **CROSS-CHAIN YIELD AGGREGATOR AND OPTIMIZER**

Our goal is to deliver one tool that provides access to  
all the best yield generation opportunities in DeFi

# DEFI MARKET

DeFi attracted more than **\$106 billion** deposits in just one year.

According to researchers it will gain **\$508B in 2028 with CAGR of 44%**

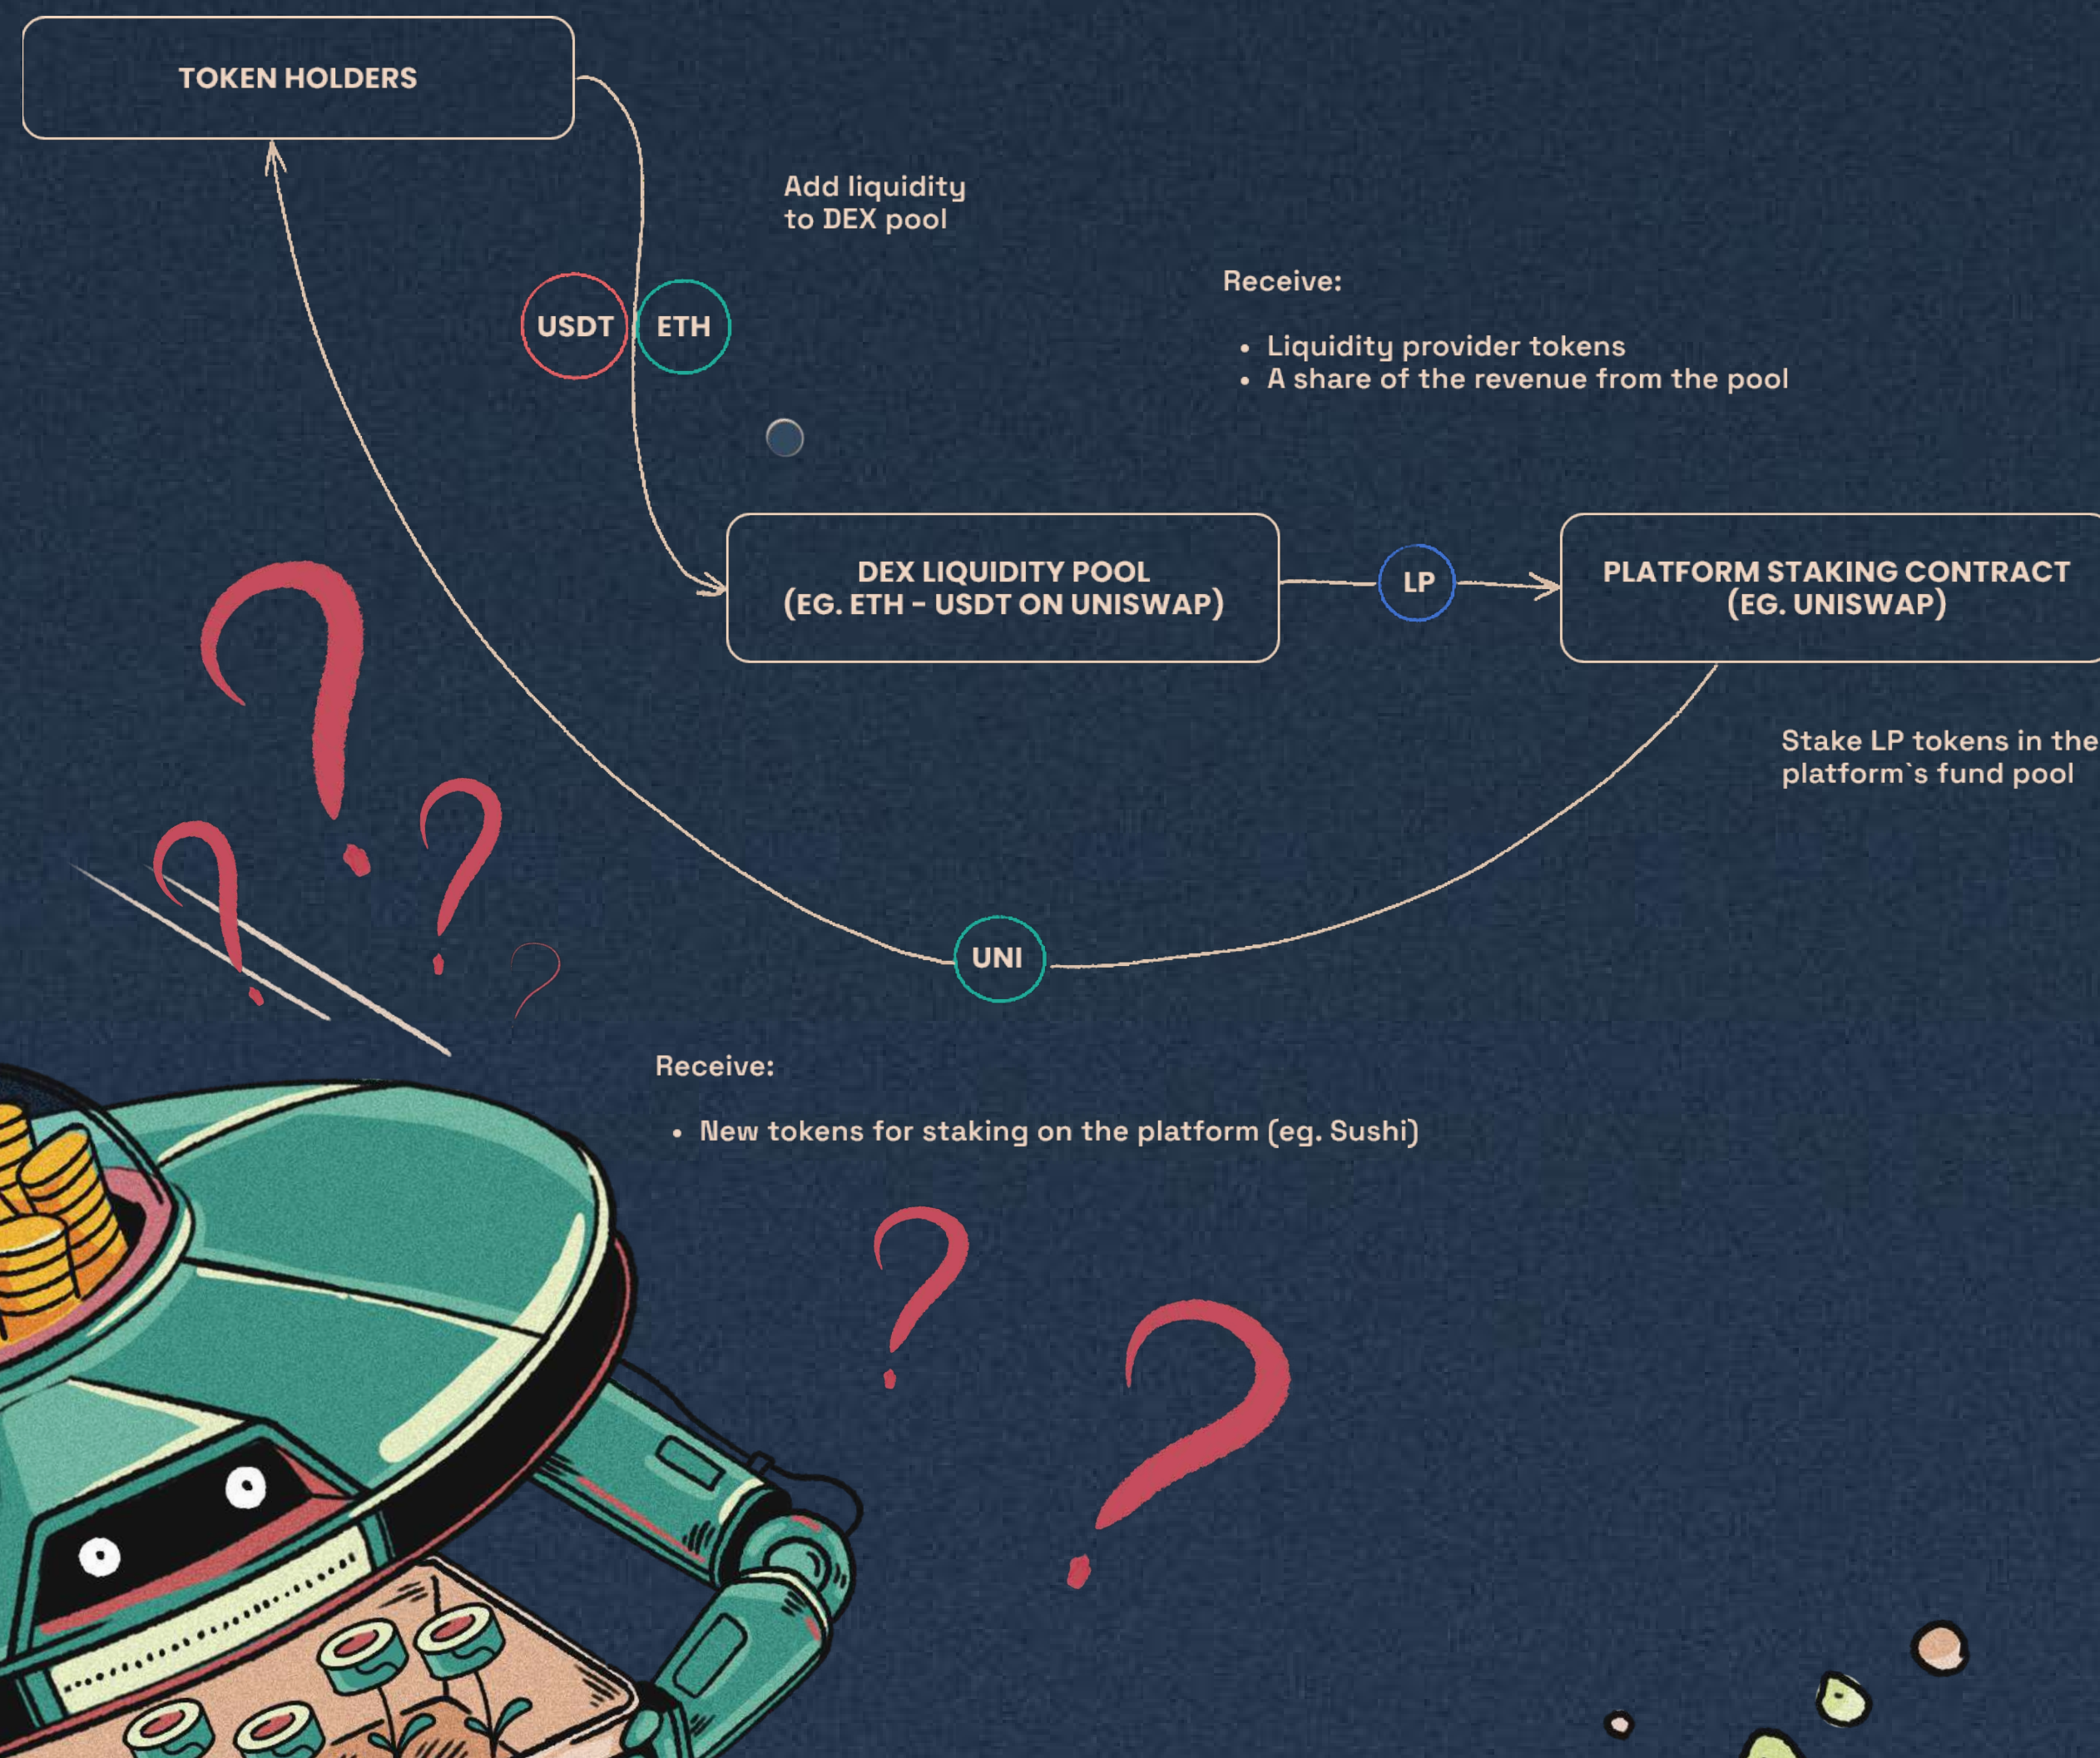

Recent **collapses of large custodial services** and CEX will increase interest in decentralised financial products.

**Liquidity** providing **is the foundation** of the DeFi market.

# FRICITION IN DEFI USER EXPERIENCE IS EXTREMELY HIGH AND PREVENTS MASS ADOPTION

03

Users need to operate **multiple Uls** and blockchains

**APYs change** all the time - users need to **move liquidity manually**

**Uls** of protocols are extremely **complicated**, not build for mass market

Users risk losing funds on **unsafe protocols**

# 🚀 UNO.FARM IS A USER-FRIENDLY SOLUTION FOR YIELD FARMING

04

- **Simplified UI** gives access the most trusted DeFi yield sources
- **Single asset entry** and withdrawal from any token
- **Automated reinvest mechanism** maximise APY
- **Autostrats automatically swap liquidity** to the best yield source across multiple chains.
- **Analytics** of users portfolio
- **Safety features** - internal audits, anti rugpull system, inheritance mechanism, insurance pool
